

Bitla Umesh Kumar

bitlaumesh04@gmail.com | +91 79898 51858 | Portfolio | LinkedIn | GitHub

Professional Summary

CSE student specializing in AI/ML and full-stack development, with hands-on experience across four internships spanning RAG systems, MERN-stack web applications, and production AI tooling. Merit-selected into an in-person industry program (top 5 students/college) and subsequently retained for a 1-month on-site internship building company-owned projects. Founder of SVIT's LEGION Club, leading a department-wide student organization.

Technical Skills

Languages: Python, JavaScript, C, HTML, CSS

Frameworks & Tools: React, Next.js, Node.js, Express.js, FastAPI, Streamlit, Git, Docker, Vercel

Databases, AI/ML & APIs: MongoDB, ChromaDB, pgvector, Supabase, RAG Pipelines, Cohere API, Groq API, OpenRouter, PyMuPDF, Upstash Redis, REST APIs

Experience

Infyntrek Systèmes – Software Developer Intern (MERN Stack) Jul 2026 – Sep 2026

- Developed and maintained full-stack web applications on the MERN stack (MongoDB, Express.js, React.js, Node.js) as part of the core Development team.
- Designed and built RESTful APIs and back-end services with Node.js and Express.js, and implemented user-facing features with React.js.
- Owned MongoDB schema design and data modeling; participated in code reviews and cross-team planning sessions to uphold engineering best practices.

Alonzo AI May 2026 – July 2026

Associate Full Stack Developer Intern

June 2026 – July 2026

- Transitioned from the SPARK Program to a 1-month on-site internship, building company-owned production projects alongside Alonzo AI's engineering team.
- Contributed across the full stack on internal products, applying Agentic Driven Development practices established during the SPARK program.

AI & Full-Stack Engineering Intern (SPARK Program) May 2026 – June 2026

- Merit-selected (top 5 students/college) for an in-person industry internship at Gachibowli, Hyderabad, building production-grade AI and full-stack projects.
- Contributed to open-source repositories via Agentic Driven Development and delivered a capstone project at program conclusion.

YugaYatra Retail OPC Pvt. Ltd. – Software Engineer Intern Mar 2026 – May 2026

- Built scalable web applications using Cursor AI, Supabase, and integrated AI technologies for live freelance client projects.
- Contributed to e-commerce deployments and seller portal management, ensuring stable, zero-downtime production rollouts.

LEGION Club, SVIT – Founder & Non-Technical Lead Feb 2026 – Present

- Founded and structured the CSE Department's student club into Technical and Non-Technical divisions to better serve the student body.
- Directed the Non-Technical division, orchestrating multiple department-wide events and managing all logistical operations end-to-end.

Projects

Natya Samhita – Sanskrit RAG Platform for Natya Shastra github.com/BitlaUmesh/Natya-Samhita

- Built a full-stack RAG platform (Next.js / FastAPI) for semantic querying of Sanskrit treatises, using pgvector HNSW embeddings, Cohere two-stage reranking, and DeepSeek V3.1 for grounded generation.
- Integrated Upstash Redis caching (24h TTL), cutting repeated query latency to ~15ms and reducing external API costs.

Neural-Sync – 4th Place, HackForge 48-Hour Hackathon github.com/BitlaUmesh/Neural_Sync

- Built a Python framework synchronizing neural network outputs with high-frequency data streams, optimizing pipelines to cut real-time inference latency.
- Secured 4th place overall and a Software Engineering internship offer by developing and presenting the framework to a panel of judges.

Vision-RAG – Multimodal Document Intelligence System github.com/BitlaUmesh/Vision-RAG

- Engineered a full-stack multimodal RAG framework integrating computer vision and LLMs to query visually complex PDFs via FastAPI, PyMuPDF, and Groq API, eliminating OCR dependency.
- Implemented hybrid similarity search with ChromaDB and local sentence-transformers to suppress hallucinations and improve retrieval precision.

Education

Swami Vivekananda Institute of Technology – B.Tech in Computer Science Sept 2023 – May 2027

GPA: 7.2/10.0 **Relevant Coursework:** Data Structures, Computer Networking, DevOps, DBMS
